**FARRAR GRINDING COMPANY** was founded in 1957 by Coy F. Farrar with the commitment to produce precision machined parts at competitive prices and without sacrifice of the highest quality standards.

Today, the **FARRAR GRINDING COMPANY** is still "The Finest Name in Grinding" and is now a woman-owned corporation, providing single operation job shop service to complete fabrication of products according to rigid customer and governmental specifications.

## Experience and Capabilities

Our business and technical experience features products and services encompassing aerospace, commercial and military aviation, auto racing and other industries. FARRAR GRINDING COMPANY offers blanchard, surface, centerless, CNC, cylindrical, internal, specialty spherical grinding, with tooling expertise and a comprehensive inspection department on-site.

FARRAR GRINDING now uses a fully integrated enterprise resource planning (ERP) system to manage the vital day-to-day business and technical aspects of our operation to include estimation / quoting, sales, manufacturing, quality assurance and product fabrication tracking to meet stringent customer requirements and delivery dates.
